WORK EXPERIENCE

Education Progress

DOTWAYS

Internship

02/2023 - 06/2023

Web application to manage schools data like schedules, users, classrooms and events. We will add other functionalities like **evaluation module** and **exam module**. In addition, We will develop **mobile application** for the parents and the students using **React Native**.

- Developed user interfaces using **React JS**.
- Developed the backend using **Node JS**, **MongoDB** as DBMS and **JWT** for the security.
- Utilized **Redux** to centralize React states.

IPMANAGER

Internship

Tunisian Ministry of Equipment and Housing 08/2022

Web application to manage IP addresses of ministry.

- Designed and implemented responsive web pages using **ReactJs** and **Tailwind CSS**.
- Developed the backend using **Spring Boot** and **MySQL** as RDBMS.
- Implemented **JSON Web Token (JWT)** authentication to secure user access and protect sensitive data.

MyJewelry

Freelance

E-commerce DropShipping project

- Developed user interfaces using **ReactJs**, **Tailwind CSS** and **Recoil** to manage React states.
- Developed the backend using **PHP** and **MySQL** as RDBMS.
- Implemented **JSON Web Token (JWT)**.
- Consumed **KNAWAT** (DropShipping company) Restful APIs.
- Integrated **Paypal** payment to facilitate secure online transactions.

Personal projects

Secrito

04/2023 - Present

I am using **React JS**, **Tailwind CSS**, **Node JS**, **MongoDB** and **SOCKET.IO** to develop this Real-Time Chat Web Application. I have completed the user interfaces and the authentication module. Currently, I am working on the messaging and friend request functionalities.

SUMMARY

As a junior fullstack JavaScript developer, I am passionate about continuously learning and improving my skills.

I also have expertise in **web scraping**.

I have a strong foundation in development best practices and logical **problem-solving**. Currently, I'm seeking for **alternation opportunities**.
